

Dean-Training and Placement Cell, Mr. D. Vijay Krishna

Students must expand the knowledge outside the academics: Dean T & P

such as IBM, Wipro, Infosys, Epam, Cognizant also conducted placement drives which is a proud moment for VFSTR.

He had also mentioned the Placement Status for the year 2018-19 and specified the number of students placed in the recruitment and also the companies which haven't recruited the students of VFSTR.

He urged that the students must have 80% CRT to attend the Campus drives. Although, this year the students had been placed with less than 80% CRT.

He also said that the students must expand the

knowledge outside the academics and seek what new things they can learn within the area of interest or the job profile they want to get into.

Knowledge and skills are the most important factors companies use to assess freshers during campus placements, he added.

What companies are expecting....

Companies are expecting Good Communication skills, positive attitude, good domain knowledge of their respective branch, good coding skills at least in three languages.

Changing of Placement pattern

National Level open coding competitions are conducted for different levels of coding jobs irrespective of the name and fame of the colleges or universities. Direct communications with the students from the HR's asking for the credentials in a short notice. The exams are being conducted immediately within the short notice period. Further rounds are also being communicated in the same way. Furthermore, the companies want the students to be trained after their graduation by giving them phased sequential training modules.

Dept. of English conducts preparatory meeting for a smooth conduct of Two-day National Conference

The department of English conducted preparatory meeting under the supervision of Division Head Prof. Allamneni. Sharada, on 11th February at VBTF-10 hall to discuss about arrangements of forthcoming Two-day National Conference on "Regional Literature in English Translations Global Perspectives" scheduled on 15th & 16th February in VFSTR in association with

Indian Council of Social Science Research ICSSR, Ministry of HRD, Govt of India.

During the session, Professor A. Sharada had briefed about the conference arrangements, responsibilities of the faculty members for the smooth conduct of the conference. All the faculty members have come forward with valuable suggestions and specific

Faculty members of English discussing on the arrangements of the National Conference.

portfolios with regard to organising committee duties and responsibilities which were assigned by Head of the Department.

Aside the registration process, conference procedure was also

discussed in detail with primary focus on arrangements to be made which were explained in detail by Dr Gomatam Mohanacharyulu-Associate Professor English, Convener of the Conference.

Mr. A. Vijaya Ratnam interacts with Govt. School students, Guntur

VFSTR's counseling psychologist Mr. A. Vijaya Ratnam has been invited by Municipal Upper Primary School, Ratnapuri colony, Guntur to deliver inspirational lecture to 7th class students on 11th February from 10.30 am to 12 am. Psychologist addressed the students of 7th class on "How to develop confidence". During the session, students also interacted with psychologist. He also explained about the preparation and memory techniques. Psychologist was felicitated by HM Sujatha.

Nervous System Problems

The nervous system is a complex, highly specialized network. It organizes, explains, and directs interactions between you and the world around you. The nervous system controls:

- Sight, hearing, taste, smell, and feeling (sensation).
- Voluntary and involuntary functions, such as movement, balance, and coordination. The nervous system also regulates the actions of most other body systems, such as blood flow and blood pressure.
- The ability to think and reason.

The nervous system allows you to be conscious and have thoughts, memories, and language.

The nervous system is divided into the brain and spinal cord (central nervous system, or CNS) and the nerve cells that control voluntary and involuntary movements (peripheral nervous system, or PNS).

The symptoms of a nervous system problem depend on which area of the nervous system is involved and what is causing the problem. Nervous system problems may occur slowly and cause a gradual loss of function (degenerative). Or they may occur suddenly and cause life-threatening problems (acute). Symptoms may be mild or severe. Some serious conditions, diseases, and injuries that can cause nervous system problems include:

- Blood supply problems (vascular disorders).
- Injuries (trauma), especially injuries to the head and spinal cord.

- Problems that are present at birth (congenital).
- Mental health problems, such as anxiety disorders, depression, or psychosis.
- Exposure to toxins, such as carbon monoxide, arsenic, or lead.
- Problems that cause a gradual loss of function (degenerative). Examples include:
 - Parkinson's disease.
 - Multiple sclerosis (MS).
 - Amyotrophic lateral sclerosis (ALS).
 - Alzheimer's disease.
 - Huntington's disease.
 - Peripheral neuropathies.
 - Infections. These may occur in the:
 - Brain (encephalitis or abscesses).
 - Membrane surrounding the brain and spinal cord (meningitis).
 - Overuse of or withdrawal from prescription and nonprescription medicines, illegal drugs, or alcohol.
 - A brain tumor.
