### Industrial / Field Visit Report

Vignans Foundation for Science Technology and Research (Deemed to be University) has organized an industrial visit to the students of B. Pharmacy III Year at Fizikem Laboratories Pvt. Ltd, G. Konduru, Vijayawada, Andhra Pradesh on 16<sup>th</sup> November 2023. This was conducted with the objective of improved practical exposure and understanding of various departments of operation like Production of solid dosage forms and liquid orals, and Quality control in the Pharmaceutical Industry which the students learned theoretically in the classroom.

Fizikem Laboratories is one of the fast growing pharmaceutical companies in South India having its presence in the industry for over 30 years. It is also in the manufacturing and marketing of Allopathic, Ayurvedic Formulations and cosmetic products. Several products generic products as tablets and capsules; and over the counter products like various oils and lotions for topical and oral route are being manufactured at this organization.

Dr. Rajendra Prasad, General Manager, addressed the students and the faculty coordinator about the products being manufactured there; policies and SOPs followed in their industry. He also described about various unit operations like mixing, drying, compression and coating as part of manufacturing of tablets and capsule products. Later, he assigned Mr. S. Shyam, Plant Supervisor for the students to visit the plant.

The students were taken to the tablet production unit first. There, several equipment like octagonal blender and sigma mixer were shown and explained about their use for mixing of powders. Fluidized bed processing for granulation was demonstrated and explained for feed inlet, set-up of processing controls, and checking the completion of the process. Then the students were taken to tablet compression area. A 32-stage rotary tablet compression machine was shown in demonstrated about the functioning of every part in detail. Stages of tablet compression like filling, compression and ejection were shown and the obtained tablets as samples were given for visual inspection and hardness checking.

Later, the students were taken to quality control area. Several quality control testing like ash value, moisture content, friability, disintegration, dissolution etc. were demonstrated by the faculty coordinator along with Mr. S. Shyam. Then packing area was visited and the students observed the process of blister packing.

The students interacted with him and the faculty coordinator actively and got clarifications for many doubts. They compared the knowledge gained here with what they were currently studying in their Industrial Pharmacy – I subject of III Year I Semester. They felt happy with the gained practical knowledge on the industrial manufacturing of tablets and filling of capsules along with their quality control and packing with detailed processes and equipment involved.

## Department of Pharmaceutical Sciences

### Industrial / Field Visit Report

Vignans Foundation for Science Technology and Research (Deemed to be University) has organized an industrial visit to the students of B. Pharmacy II Year at Jocil Limited, Dokiparru, Andhra Pradesh on 11<sup>th</sup> November 2023. This was conducted with the objective of improved practical exposure and understanding of various instruments involved in the manufacturing of the dosage forms and cosmetic products which the students learned theoretically in the classroom.

Jocil Ltd. is an ISO 9001:2015 certified company and is one of the reputed pharmaceutical companies in Andhra Pradesh. It has facilities for the manufacturing of Stearic Acid Flakes, Fatty Acids, Toilet Soap, Soap Noodles and Refined Glycerine. Our students visited the plant at located at Dokiparru, Guntur.

Mr. R. Benarjee, Production Advisor, addressed the students about the products being manufactured there; about how to maintain the ISO guidelines; and other precautions and policies to be followed in the industry. He also described about large scale manufacturing of soap noodles, toilet soaps, and packing processes. Later, he assigned one of the supervisors, Mr. Prakash to the students to visit the entire plant.

All the students were made to wear aprons, masks and helmets for head protection. Then the students visited various unit operation areas of mixing, drying, distillation, separation/sedimentation etc. Various instruments like tray dryer, drum dryer, spray dryer, fractional distillation, elutriation tank were shown and the operational procedures and conditions were demonstrated by Mr. Prakash.

The students interacted with him and the faculty coordinator actively and got clarifications for many doubts. They compared the knowledge gained here with what they were currently studying in their Pharmaceutical Engineering subject of II Year I Semester. They felt happy with the gained practical knowledge on the manufacturing of soaps with detailed unit operations involved.

## Department of Pharmaceutical Sciences

### Industrial / Field Visit Report

Vignan's Foundation for Science Technology and Research (Deemed to be University) has arranged an industrial visit for first-year B. Pharmacy students to Jocil Limited, Dokiparru, Andhra Pradesh, on 13th November 2023. This was undertaken to enhance practical exposure and comprehension of the many equipment utilised in the production of dosage forms and cosmetic items that students studied conceptually in the classroom.

Jocil Ltd. is an ISO 9001:2015 certified organisation and is recognised as a prominent pharmaceutical firm in Andhra Pradesh. The facility produces Stearic Acid Flakes, Fatty Acids, Toilet Soap, Soap Noodles, and Refined Glycerine. Our students explored the facility situated in Dokiparru, Guntur.

Mr. R. Benarjee, Production Advisor, informed the students of the made products, the maintenance of ISO requirements, and the requisite safeguards and procedures to be adhered to in the industry. He also detailed the large-scale production of soap noodles, toilet soaps, and packaging methods. Subsequently, he designated Mr. Prakash, one of the supervisors, to accompany the students on a tour of the entire factory.

Every student were required to don aprons, masks, and helmets for cranial protection. The students subsequently toured other unit operation areas, including mixing, drying, distillation, and separation/sedimentation. Mr. Prakash exhibited the functioning processes and conditions of various instruments, including tray dryer, drum dryer, spray dryer, fractional distillation, and elutriation tank.

The students engaged with him and the faculty coordinator proactively, obtaining clarifications for numerous enquiries. They were pleased with the acquired practical understanding regarding the manufacturing of soaps and the intricate unit activities involved.

**Faculty Coordinators**

1. Mr. M. Venkata Ramana
2. Dr. P. Naresh
