

BACHELOR OF PHARMACY

**ACTION TAKEN REPORT ON FEEDBACK OBTAINED DURING
2020-21**

11/08/2021

Stakeholder	Comments/Suggestions	Action Taken or Suggested
Student	Career-oriented training sessions should be conducted to become successful Pharma professional.	Career-oriented sessions are planning with industry trainers.
Employer	Students should have an extensive understanding of the software that is widely using in the pharmaceutical industry.	Training sessions on the software's applications in pharmaceutical sciences are arranging for this year.
	Workshops/seminars should be conducted on Pharmacovigilance, Regulatory affairs, Good Laboratory Practices (GLP), and Statistical Analysis System (SAS) for acquiring the knowledge and skills to work in the pharmacy profession.	Two workshops and two seminars are planned on these emerging areas for the benefit of students in acquiring knowledge and skills.
Faculty	Field projects should be planned to understand community pharmacy services broadly.	Students are allowed and encouraged to carry out their field projects by visiting community pharmacies to acquire skills and understand the services of a community pharmacist.
