COURSE DESCRIPTION AND OBJECTIVES:

Engineering graphics is the language of engineers and is the most effective way of communicating and sharing technical ideas in the form of pictures/drawings. The objective of this course is to familiarize the students with the conventional concepts of engineering drawing and computer aided drawing.

COURSE OUTCOMES:

Upon completion of the course, the student will be able to achieve the following outcomes:

COs	Course Outcomes	POs
1	Communicate the technical ideas in the form of drawings.	1
2	Apply the drawing skills in representing various geometrical features.	1
3	Develop orthographic projections and isometric views of various objects.	2
4	Estimate the lateral surface area of regular geometrical solids.	2
5	Sketch simple objects and their pictorial views using AutoCAD.	5

SKILLS:

- ✓ Convert isometric views of objects into orthographic views and vice versa.
- ✓ Visualize the shape of 3D components.
- ✓ Create pictorial views by using AutoCAD.
- ✓ Understand projections by visualization.
